

One-page summary: storefront accessibility

STORE	INSPECTED	PREPARED FOR	METHOD
ada-fix-demo.myshopify.com	2026-09-28	Counsel, internal review only (in a real summary: as counsel directed in writing)	Keyboard only; VoiceOver (macOS, Safari); axe-core 4.10.2; Chrome

Scope. One product page (Harbor Sofa), the cart drawer after Add to cart, on the date above. Each item was reproduced twice with the keyboard and VoiceOver. This summary lists only behavior verified on the live storefront. It does not compare the store with any complaint.

VERIFIED 1 · CART DRAWER · WCAG 2.1 SC 4.1.2 NAME, ROLE, VALUE

The remove-item button has no name

A screen reader announces the control as **"button"** and nothing else. A blind shopper cannot tell that it removes the item.

1. Open /products/harbor-sofa.
2. Press Enter on Add to cart; the cart drawer opens.
3. Move to the trash-can icon next to the quantity.

In code: the button has `aria-label=""` and only an icon inside.

The trash-can icon is the unnamed button.

VERIFIED 2 · CART DRAWER · WCAG 2.1 SC 2.4.3 FOCUS ORDER, 2.1.1 KEYBOARD

Focus stays behind the cart drawer

After Add to cart, the drawer covers the page, but keyboard focus stays on the Add to cart button behind it. Tab moves through the hidden page, not the cart. Escape does not close the drawer.

1. On the product page, press Tab to Add to cart, then press Enter.
2. Press Tab three times: focus reaches "Buy it now", "Share" and a product card behind the drawer.
3. Press Escape: the drawer stays open.

The focus outline (bottom left) stays on Add to cart, behind the overlay.

VERIFIED 3 · PRODUCT PAGE · WCAG 2.1 SC 4.1.2, 1.3.1 INFO AND RELATIONSHIPS

The Size dropdown has no label

The word "Size" is shown on screen but is not connected to the dropdown. VoiceOver announces **"2-Seater, pop-up button, main"**: the value and the page region, but no field name.

1. On the product page, press Tab to the dropdown under "Size".
2. Listen to the announcement.

"Size" is plain text, not a label.

\$299 · fix plan in 3 business days

Every defect on the main journeys (home, collection, product, cart, search, menus, forms), what each needs in code, and a fixed quote. Credited in full if remediation is signed within 30 days.

\$1,500 · estimated remediation for this store

The three items above fall under the \$1,500 minimum. A full inspection of the journeys above usually finds more; the fix plan gives the fixed quote.

What this is not. Not legal advice and not a compliance certification. It covers only the pages and dates above; automated tools find only part of accessibility defects, so each item here was confirmed by hand. It is not marked privileged; counsel decides its treatment and distribution. Notes and screenshots are kept encrypted and deleted after 90 days unless counsel directs otherwise.
